

DEFI BOMB

THE LAB

WHAT IS **DBOMB**

“DEMOCRATIZING GREEN CANDLES”

The DeFi Bomb is a DeFi wallet-integrated tool that entitles DeFi Bomb Fuses to vote on where the DeFi Bomb Wallet is spent. The Bomb Wallet gradually builds toward \$50,000 from a tax on the transaction volume as the \$DBOMB token is traded. Each DeFi Bomb has 5 Contender tokens that are vying to receive the \$50,000 DeFi Bomb buy.

DBOMB TOKENOMICS

DeFi-Bomb Yield Distributions

The DeFi-Bomb treasury wallet will make a \$50,000 market buy of the winning token which is split in the following way

- 75% (\$37,500) between top 100 DBOMB holders (weighted)
- 25% (\$12,500) between all \$DBOMB NFT holders (weighted)

The weightings work based of % of the total tokens in top 100 that you hold. And % of the total supply of NFTs you hold.

Name	DBOMB
Total Supply	1,000,000,000
Ticker	\$DBOMB
Contract address	TBA
Network	Ethereum

BUY/SELL FEES (9%)

SUPPLY DISTRIBUTION

WHAT IS DBOMB FUSE

A “DeFi Bomb Fuse” is a crypto wallet that holds at least 10,000 \$DBOMB tokens. To vote, a DeFi Bomb Fuse simply selects which Contender they are voting for on the DeFi Bomb dApp, before the Bomb wallet hits \$50,000.

Each DeFi Bomb Fuse gets 1 vote, per DeFi Bomb, plus any additional votes from holding DeFi Bomb NFTs. Each Fuse’s vote is public information on the DeFi Bomb dApp.

1 Vote for every 10,000 \$DBOMB held.

10,000 DBOMB = 1 Vote

20,000 DBOMB = 2 Votes

30,000 DBOMB = 3 votes

40,000 DBOMB = 4 Votes

100,000 DBOMB = 10 Votes

1,000,000 DBOMB = 100 Votes

BOMBOCRACY

10,000 NFT COLLECTION TO DOMINATE THE DBOMB FUSE

WHY DBOMB NFT

“Welcome to the Bombocracy”

10,000 NFT COLLECTION TO DOMINATE THE DeFi BOMB

Bombercrats will earn 25% of the BOMB wallet (\$12,500 split between all NFT holders) as yield that can be claimed from our Dashboard.

Bombacrats are the DeFi Bomb Protocol’s NFT line. Each Bombacrat is unique Bomberman art, generated randomly by computer, in profile picture style, in the form of a Bomberman character. Become a member of the “Bombacrats Parliament” to gain influence over the DeFi Bomb. While being a Fuse entitles a holder to their vote, Bombacrats boost and multiplies the number of votes a Fuse gets.

WHY DBOMB NFT

Each Bombocrat NFT grants the Fuse a voting multiplier in the ongoing DeFi Bomb.

The more Bombocrats you hold, the more votes you get!

1x NFT = x2 votes

2x NFT = x3 Votes

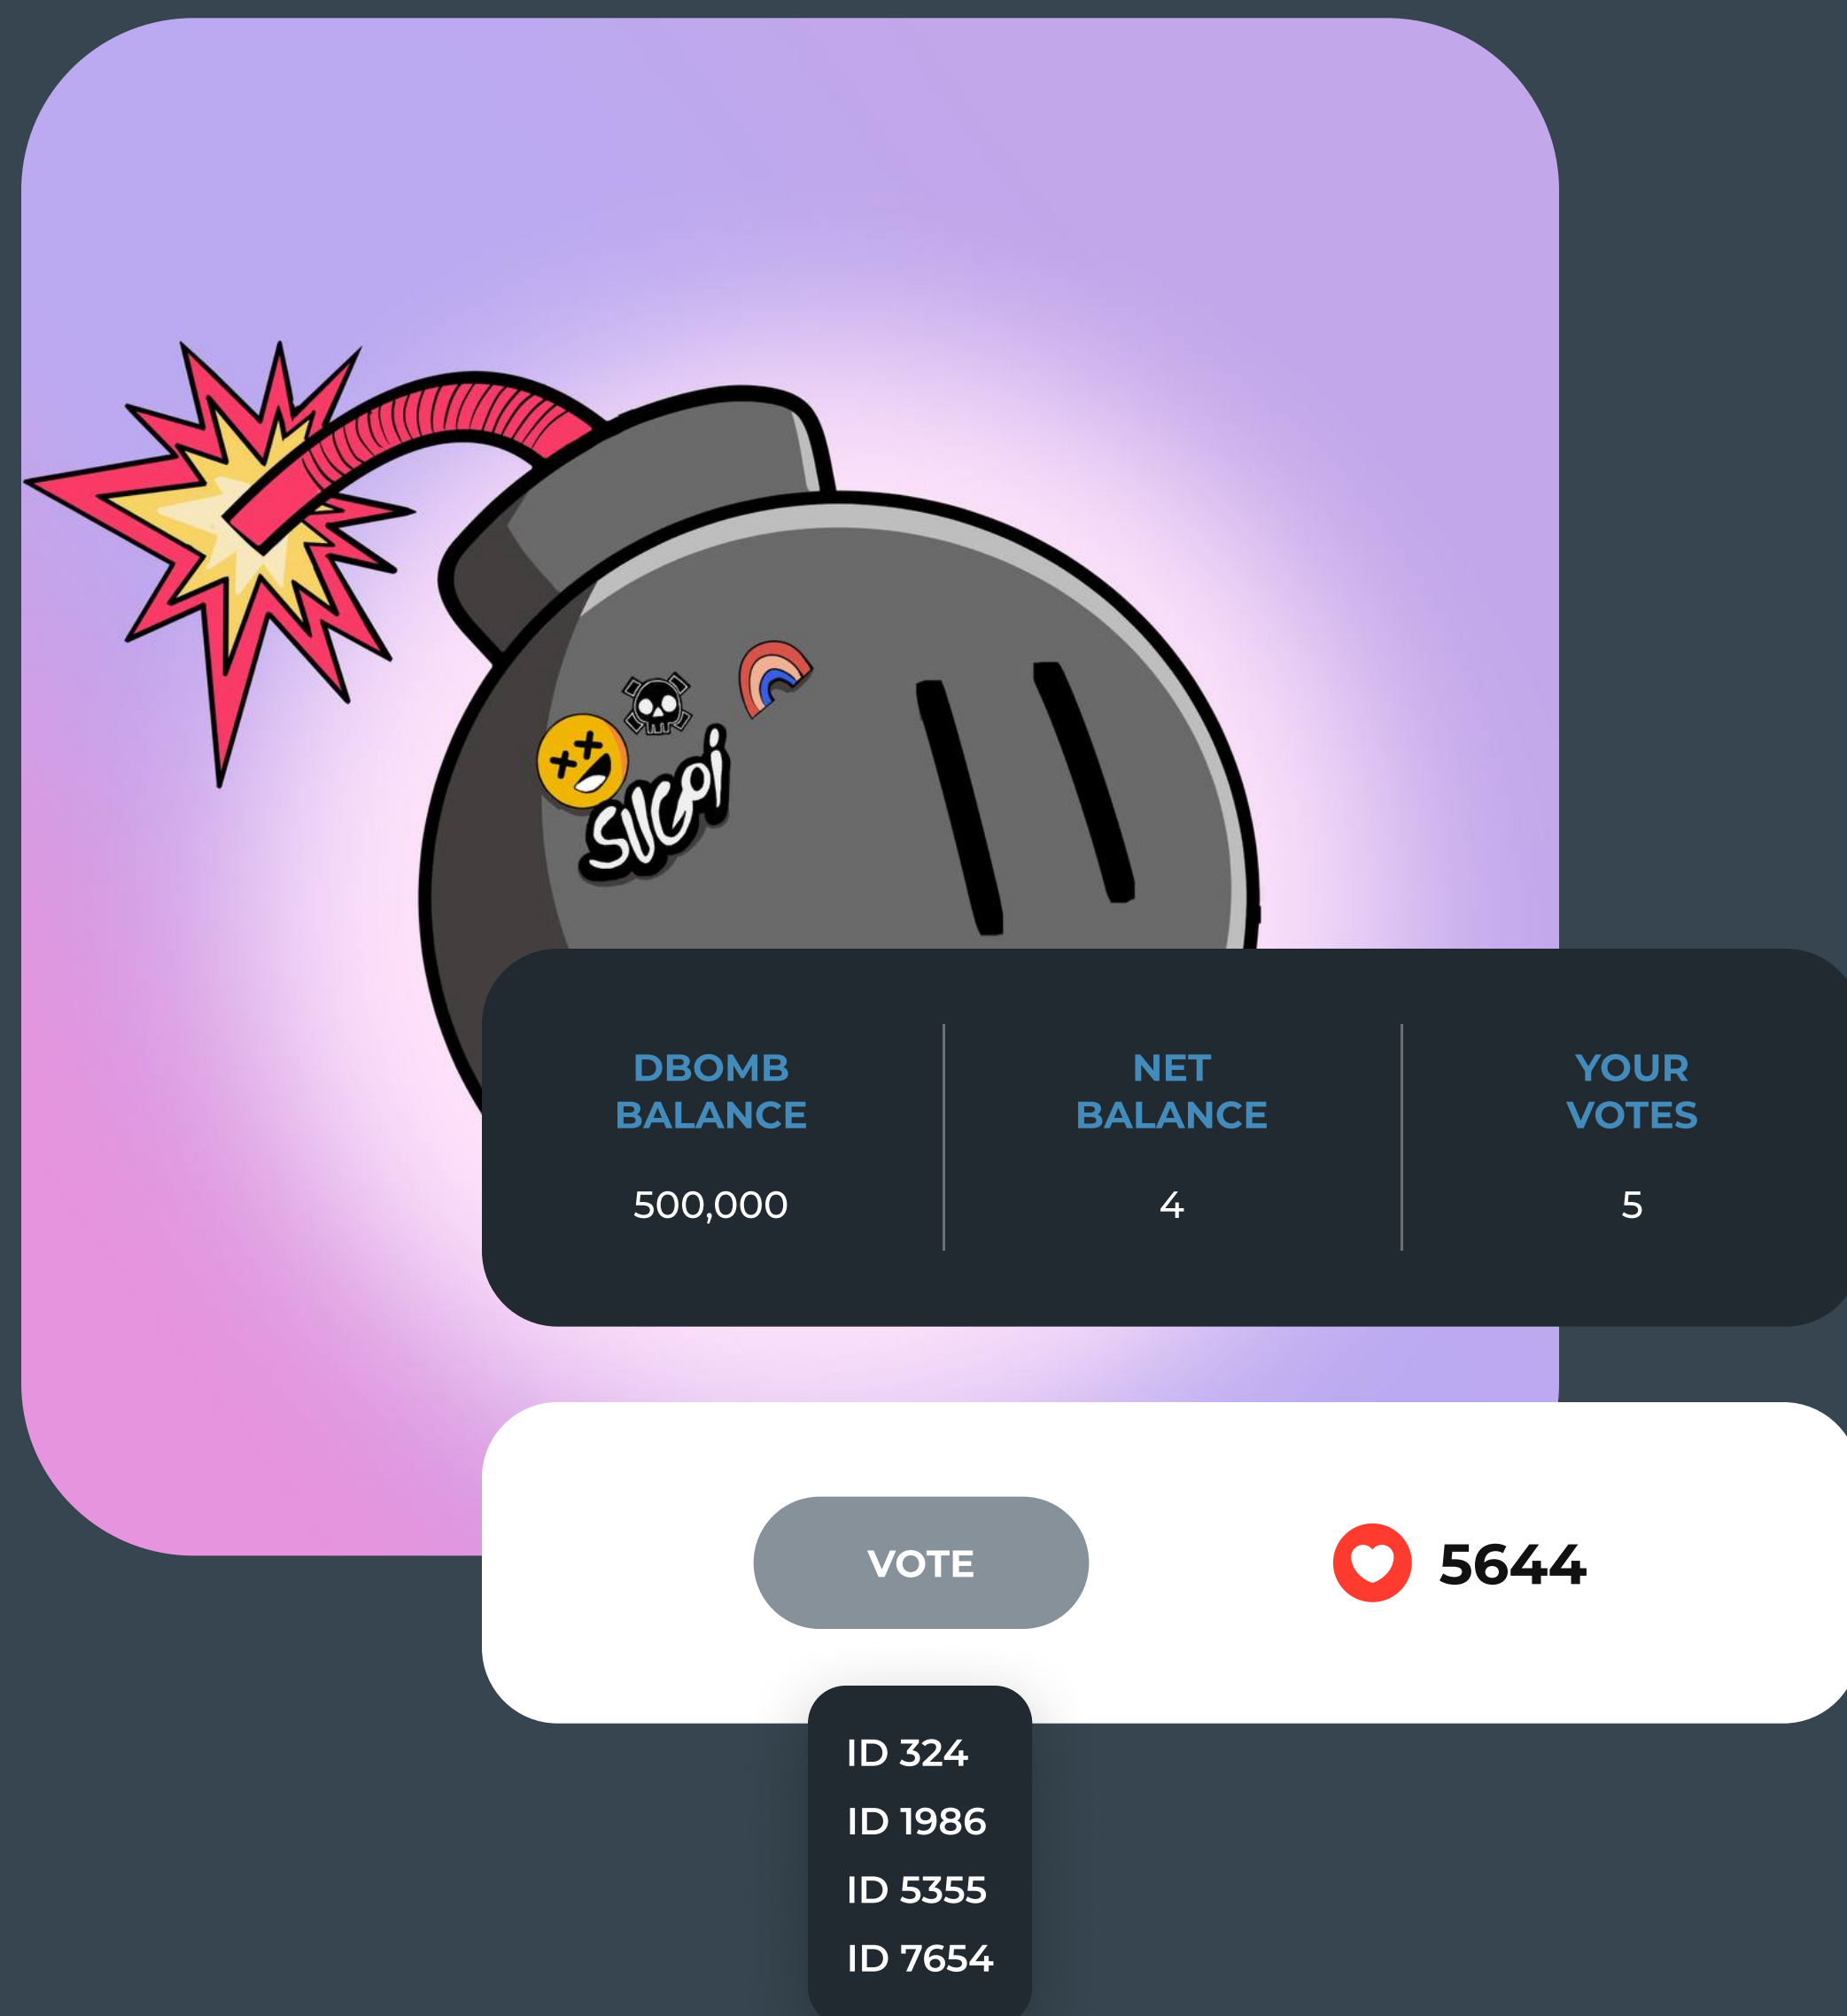

3x NFT = x4 Votes

Etc etc

For example, if a wallet holds 10,000 \$DBOMB tokens, and 3 Bombocrat NFTs, that holder is entitled to 4 votes in the DeFi Bomb. If a wallet holds 20,000 \$DBOMB tokens, and 1 BomboCrat NFT, that holder is entitled to 4 votes in the DeFi Bomb. (2 votes for 20,000 DBOMB x 2 for 1 NFT)

Bombercrats will earn 25% of the BOMB wallet (\$12,500 split between all NFT holders) as yield that can be claimed from our Dashboard.

For example, if there are 100 total NFTs minted, and you own 10 NFTS, you will earn 10% of the \$12,500 of each Bomb.

DEFI BOMB

The “DBOMB Team” are anonymous and pseudonymous developers and computer programmers. The DBOMB Protocol is decentralized, and bigger than any particular individual or team.
